

myDPD for business

Your new business portal to manage all your shipments

The self-service portal is a multifunctional portal for shippers that provides transparency throughout the lifecycle of parcels: from shipping to delivery.

The portal gives DPD customers full control over their shipments, as well as the ability to change shipment details.

Full tracking

Parcel information, history and proof of delivery all available in one place.

Exceptions

Easy identification of specific parcels and automated actions according to status.

My Cases

Full overview of your cases via our Salesforce community.

Redirections

Possibility to perform live redirection to adjust the delivery.

Reports

Dedicated screens to review redirection and service quality statistics.

Carbon Calculator

Stay informed about the environmental impact during parcel deliveries.

Our upgraded business portal offers also additional advantages:

- Download delivery confirmation (POD) for all your shipments
- Filter specific parcels (for example, by shipment number, country, product name, shipment status, etc.)
- Ability to export parcel lists
- Built in help functionality to help guide you through the portal
- Lead time calculator: Calculate the lead times to your destination based on zip codes
- Customization of your dashboard
